

We know you have options when it comes to purchasing Constant Pressure Modulating Valves. That's why we want you to know more about Steriflow Food & Beverage's FBCPM valve. Not only do we have both inlet and outlet air loaded valves that are ideal for HTST/UHT pasteurization, but also a simpler design that makes maintenance easy.

How does Steriflow Food & Beverage compare?

Here are a few of our key differences from other companies that we are most proud of:

Ease of maintenance.

One diaphragm versus fifteen parts that must be assembled.

Lifetime diaphragm warranty.

We are so sure our diaphragm will last, we guarantee it.

Operates across a range of pressures and temperatures.

Our standard valve operates up to 200 psi @ 300°F.

3A® certified.

Rest assured, we are certified.
